

KAP

1. modul:

Analyse og
refleksion

1st module:

Analysis and
reflection

Hvorfor analyse? / Why analysis?

- Analysen er et redskab til afdække strukturer og betydninger i den musik, vi beskæftiger os med – med nogle hovedsigter:
- Refleksion - erkendelse
- Frembringelse af egen musik
- The analysis is a tool to uncover the structures and meanings in the music we are dealing with - with some principal aims:
- Reflection – comprehension
- Creation of own music

ANALYSE / ANALYSIS

- definition

- Identifikation af musikkens bestanddele:
 - Melodier, akkorder, rytmer, klange etc.

samt

- Etablering af forståelse for deres sammenhænge

- Identification of music elements:
 - Melodies, chords, rhythms, sounds, etc.

and

- Establishing understanding of their relationships

Analytisk praksis og teoretiske systemer / Analytical practice and theoretical systems

- En musikalsk analytisk praksis kan anvende en tilgang, der er sat i begrebsramme af et musikteoretisk system
- etablering af et musikteoretisk system kræver en musikalsk analysepraksis
- A musical analytical practice may use an approach that is set in the conceptual framework of a music theoretical system
- establishment of a music theoretical system requires a musical analysis practice

Analyse i KAP / Analysis and KAP

- 1. modul: Analyse og refleksion
 - 5. modul (2.år): Stiløvelser
 - Analysepraksis med udgangspunkt i de studerendes egen tilgang
 - Relevant musikteori vil blive bragt i spil i relation til de konkrete musikalske problemstillinger i modulforløbet
- 1st module: Analysis and reflection
 - 2nd module: Exercises in style (2nd year)
 - Analytic practice based on the student's own approach
 - Relevant music theory will be taken into use in relation to the specific musical issues in the module course

- Spørgsmål er velkomne!
- Any questions?

En præsentation/Presentation:

**En model for overordnet
musikalsk struktur /
A principle for overall
musical structure**

- Til brug for:
 - Analyse
 - Arrangement
 - Komposition
 - Produktion
- ikke bundet til genre eller stil!

- For use in:
 - Analysis
 - Arranging
 - Composition
 - Production
- not tied to genre or style!

To overordnede satstyper / Two principal types of composition:

- Integreret sats / Integrated composition
- Funktionel orkesterpolyfoni (FOP) / Ensemble polyphony with functional layers

Integreret sats / Integrated composition

- Alle stemmer er i direkte forbindelse med hinanden / All voice-parts directly in connection with each other
 - Forskellige typer / different types:
- **homofon sats**, hvor alle stemmer i det store og hele følge melodien
 - fx koral / Homophonic composition
- **polyfon sats** (flere selvstændige stemmer)
 - fx fuga o.lign. / Polyphonic composition

Integreret sats - Stryger-sektion

Integrated composition - String section

A **B**

$D^{\flat}\Delta/F$ $Fm\Delta^9$ Fm^7 $F\circ^7$ $G^{13}(\flat^9)/F\overset{\flat^{13}}{\underset{\sharp^9}{C^7}}/F$ $F\flat\Delta^9(\sharp^{11})$

Stryger-sektion

The image shows a musical score for a string section. It consists of two systems of staves. The first system has a treble clef on the top staff and a bass clef on the bottom staff. The second system has a treble clef on the top staff and a bass clef on the bottom staff. Above the first system, there are two boxed letters 'A' and 'B'. Above the second system, there are two boxed letters 'A' and 'B'. Between the two systems, there is a line of complex chord notation: $D^{\flat}\Delta/F$ $Fm\Delta^9$ Fm^7 $F\circ^7$ $G^{13}(\flat^9)/F\overset{\flat^{13}}{\underset{\sharp^9}{C^7}}/F$ $F\flat\Delta^9(\sharp^{11})$. The word 'Stryger-sektion' is written vertically to the left of the staves. The notation includes various notes, rests, and accidentals, with some notes beamed together. The second system shows sustained notes with long horizontal lines above and below them, indicating a sustained or 'pedaled' effect.

Funktionel orkesterpolyfoni

FOP /

Ensemble-polyphony with functional layers

- Musikkens udtryk formidles af flere selvstændige stemmer/stemmekomplekser / The music is expressed through several independent voice-parts
- Funktioner (roller) / Functions
- Typisk i ensemble med forskellige typer instrumenter/vokaler/sektioner / Typically in an ensemble with different instruments/vocals/sections
- EX?

Tre overordnede funktioner i FOP:

- Forgrund - primær melodi / Melody-foreground
- Baggrund(e) - mulighed for flere
To hovedtyper:
 - Akkordbaggrund (*pad*)
 - Melodibaggrund (sekundære melodi(er))
/Backgrounds: Chords – secondary melodies
- Akkompagnement / rytmegruppe / Rhythm section

Andre modeller – fx Allan Moore: ”*Functional layers*”

- Melodisk lag: Primære og sekundære melodier /
- *Groove* / rytmisk lag: trommer og percussion
- Bas-lag: ostinater, figurer og linjer
- Harmonisk udfyldning (*pads o.lign.*)

FOP: Nature Boy – Benson/Ogermann

| INTRO | | VERS 1 | VERS 2 | |

- 1. Sats - metoder for sammensætning af toner: Stemmeføring, akkordbeliggenhed
- 2. Instrumentation - klang - farve, kolorit + register - bruges til at skabe balance mellem elementerne
- 3. Form - strukturering af forløb

Elementerne i funktionel orkesterpolyfoni

FOP – Analysens resultat:

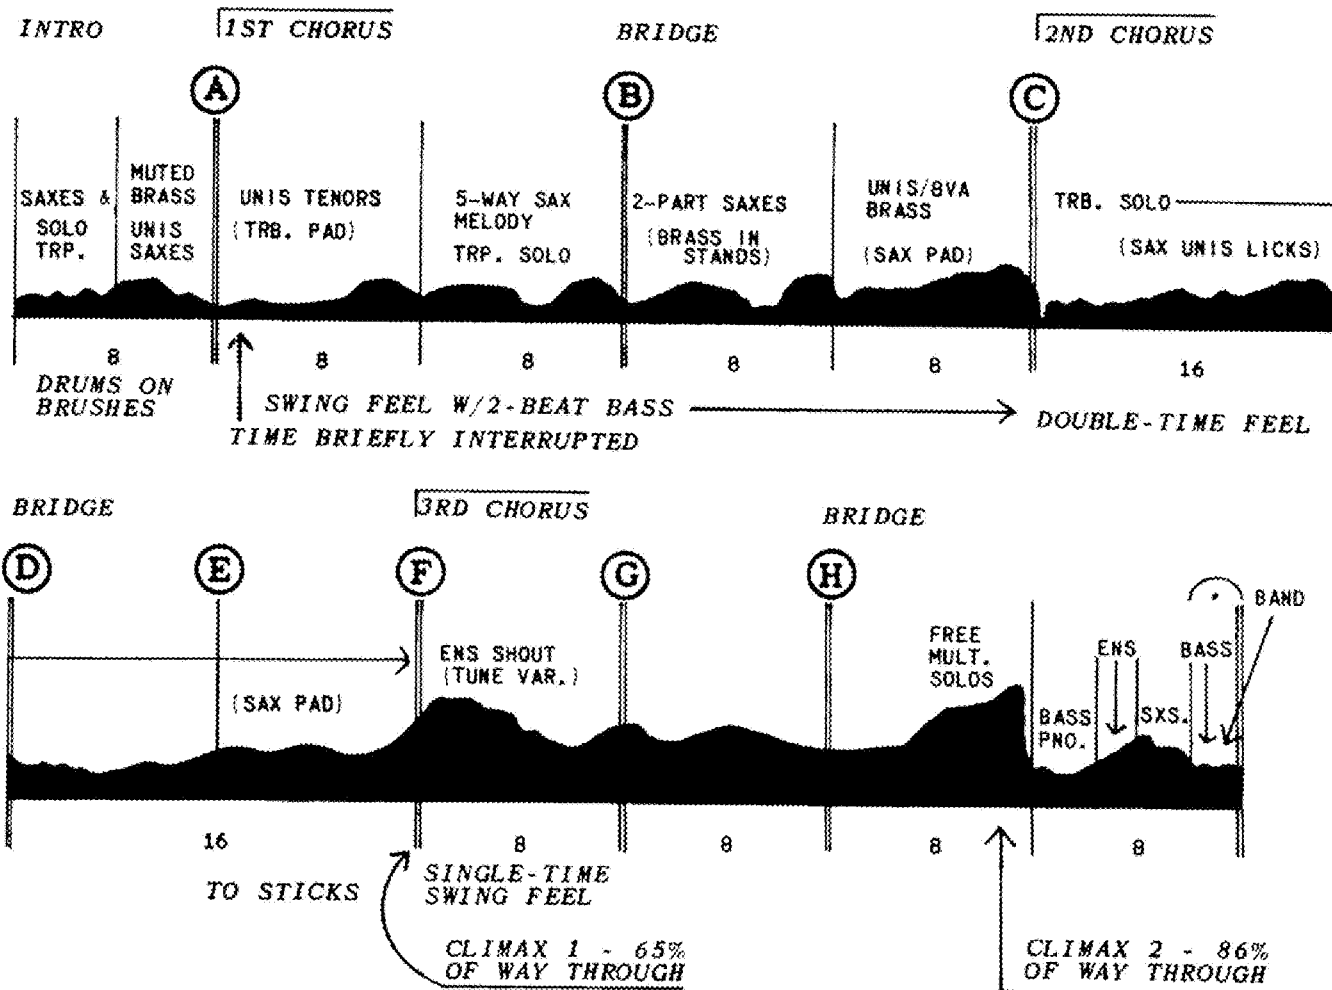

| INTRO | | VERS 1 | VERS 2 | |
